

ISOS Course

# Ocean Data View

Prof. Birgit Schneider, Institute for Geosciences, CAU

**09 May 2016 | 09:00 - 16:00 h**

**10 May 2016 | 09:00 - 12:00 h**

The course will enable you to apply the freely available software 'Ocean Data View (ODV)' and embedded oceanographic data for your work. It is a software-package for interactive exploration, analysis and visualization of oceanographic and other geo-referenced profile or sequence data. The software runs on Windows, Mac and Linux/Unix systems. All created configurations are platform-independent and can be used on all systems.

We will focus on the eWOCE and WOA data bases, but you are encouraged to bring your own data in order to tailor the course according to your personal needs.

**Venue:** Leibnizstraße 1, room 105a

*ISOS PhDs have priority in our courses.*

*Child care can be provided if we have two weeks advance notice.*
