

„MEET THE PROF“

Kerstin Johannesson

future ocean
KIEL MARINE SCIENCES

INTEGRATED SCHOOL OF OCEAN SCIENCES

Professor in Marine Ecology, University of Gothenburg
Director of the Linnaeus Centre for Marine Evolutionary Biology

26.09.2013 | 15:15 - 16:30 hrs

"I should like to discuss with the students how they see the role of science in society, and discuss the role and involvement of scientists in policy-making and politics. But of course, I would also be interested in discussing what ever topic is brought up by these young scientists."

Kerstin Johannesson, director of the Linnaeus Research Centre in Marine Evolutionary Biology in Sweden, performs research on how new species are formed. In a career spanning 27 years she has been influential in initiating multidisciplinary projects, mentoring students and has served on national and international committees for science and policy. In addition to her numerous scientific honours (including election to the Royal Swedish Academy of Sciences), Kerstin is active in the communication of science to the public and in schools. She lives in Tjärno with her husband and two cats.

During Meet the Prof. events you can meet – personally and informally – with top-level international scientists and experts visiting Kiel. Find out what they think are the top challenges in their field and what it takes to make a career within or outside of science. These are open events for all interested participants from Bachelors students to Post-Docs. You do not need to be registered with the ISOS.

Venue: GEOMAR west shore building, large conference room (großer Konferenzraum, R.075)

Contact: Avan Antia
Integrated School of Ocean Sciences (ISOS)
aantia@uv.uni-kiel.de

This event is open to all interested young scientists.
