

Sustainable Ocean Development – A Perspective from Former, Current and Future Kiel Marine Scientists

September 28 – 30, 2015 | New York City

The international symposium will bring together scientists closely connected to Marine Sciences in Kiel, Germany for multidisciplinary exchange in the field of integrated ocean science in support of sustainable ocean development. Research alumni of Marine Sciences in Kiel currently working at institutions in North America, Marine Scientists with international backgrounds currently working in Kiel and postdocs from the organizing institutions are invited to exchange their views on social, economic and environmental consequences of anthropogenic impacts on the ocean and on chances and challenges for sustainable ocean development.

Science Sessions:

- Valued Ocean
- Ocean Conservation
- The Ocean in 2100

Sessions will include invited keynote lectures and presentations by selected applicants as well as pitch talks and a lively poster session.

Invited lecturers include

- Liesbeth Lijnzaad, Maastricht University, NL
- Caleb McClennen, Wildlife Conservation Society
- Micheal Oppenheimer, Princeton University
- Andrew Thurber, Oregon State University

Timeline:

Deadline for submission of applications:
June 8, 2015

Decision on contribution acceptance:
June 25, 2015
