

## ISOS Course

# Marine Mineral Resources from the Deep-Sea

Dr. Sven Petersen, GEOMAR

20 October 2016 | 09:00 - 13:00 h

Marine minerals are seen as possible future resources that could add to the global raw materials supply. At present, a proper assessment of these resources is not possible - it is clear, however, that the seafloor may host a vast resource and mining could have a profound impact on global metal markets.

This course will address the geology and resource potential of deep-sea minerals as well as legal aspects and environmental impacts of potential mining activities and is open to participants from all disciplines - No prior knowledge is required.

If you want to get more information on this topic follow these links:

<http://www.geomar.de/en/research/marine-resources/mmr/mineral-resources/>

<http://dsm.gsd.spc.int/index.php/publications-and-reports>

**Venue:** Large conference room GEOMAR Westshore (Düsternbrooker Weg 20).

*ISOS PhDs have priority in our courses.*

*Child care can be provided if we have two weeks advance notice.*
