

ISOS Course

Basics of University Teaching

Stefan Braun, Hochschuldidaktik.de

16 + 17 July 2018 | 09:00 – 17:00 h

Designing, being responsible for and running courses are among the main skills of teachers – especially since Bologna. This seminar is geared to those who want to further develop and implement these skills. In this two-day workshop, you will learn the essentials of university teaching and will have the opportunity to optimize your own classes. Putting knowledge into action is central to the workshop. Learn to handle the creative process of an academic course adeptly and to playfully manipulate the central topics and spheres of activity of teaching.

Contents:

- | Reflection on and exchange of your experiences and expectations as a teacher and a learner
- | Interacting with your course participants
- | The basics of the psychology of learning
- | Formulating learning and teaching objectives
- | How should I choose course content and reduce the amount of material?
- | Interesting models of seminar progression
- | Forms of organisation and communication within the course
- | Implementing new teaching methods: activating teaching methods and self-organised learning
- | Transfer the methodical and teaching measures to your own courses
- | Final presentation

Voices from previous participants:

“The balance between input & practical work was particularly useful.”

“I obtained a completely new perspective on teaching.”

Venue: Leibnizstraße 1, room 105a

ISOS candidates have priority in our courses.

Child care can be provided if we have two weeks advance notice.
